

# Brugg Cables Academy

A new era of learning from the experts.  
Online and hands on training for high voltage cable systems.

## Stay connected.

**Professional development requires further learning. Our employees as well as our external partners and customers benefit from the courses offered by the Brugg Cables Academy.**

Brugg Cables is an innovative provider of cable system solutions up to 550 kV. We have extensive know-how in the field of power transmission that is based on years of experience, the handling of many challenging projects and the outstanding expertise of our international teams. The Brugg Cables Academy includes professional development

courses for talent management and hosts courses for customers and partners. Our know-how makes your projects a success. All training courses are held at our Swiss headquarters in Brugg, at our international offices, on-site at customer premises as well as online and include both theory-based and practical elements.
